Passage I: questions 36-40

Brisk walking is good for the heart, which makes a lot of sense. The heart is a muscle, after all, and anything that makes the blood flow faster through a muscle helps keep it in shape. But regular walking also lowers blood pressure, which decreases the stress on the arteries. It can boost the amount of HDL cholesterol (the good one) in the blood. It even seems to make the blood less "sticky," and therefore, less likely to produce unwanted clots. This all adds up to as much as a 50-
